

Group Records Hot Topics

- There have some new changes to the database of our Group Records. WSO has added a longitude and latitude field to help locate meetings
- There is also a new field that allows for a groups status to be changed to “Reported Not Meeting”. This allows WSO not to continue to send people to meetings that are not meeting. The group will be temporarily removed from both the WSO toll-free information meeting line and the Public Outreach Web Site meeting search results. There is a 30-day attempt to update the status of the meeting.
- Suggestions to prevent the “Reported Not Meeting” status from occurring:
 1. Add signs inside the building so the meeting can be easily located.
 2. Leave a note on the door if the group is not meeting on a specific day.
 3. Notify the Area (NYN) or WSO right away when the location changes or the group no longer meets.
- I have been doing changes as I receive them. If you are interested in standing for this position next Fall that is what I do, I make changes. It also entails a bit of investigative work. The changes are to the WSO database and NYN records of the groups. It also involves the mass subscription to the electronic copies of the Northern HiLites and keeping a list of the hard copy subscriptions for the NYN newsletter. I also maintain, with the delegate, the list of District Representatives and the current list of the Officers and Coordinators for NYN.

Respectfully Submitted

Lynda S.
